Work Experience

Antino Labs

Software Developer (Frontend)

Aug 2022 – Present
Gurgaon, India

Antino Labs is Service Based Company, offering end-to-end technological solutions. We excel in web development, covering UI/UX, frontend, backend, and scalable deployment.

AlmaBetter

- Developed a Content Management System (CMS) like Strapi for an online learning platform where we can create, map, and organize digital content to create courses, chapters, assessments, etc like .
- Bootstrapped the front-end using React CRA and styled with Material UI.
- Implemented Rich Text Editor (RTE) functionality with multimedia upload for formatting website content.
- Used Redux-Toolkit for state management and Redux-Thunk for asynchronous operations, handled form-fields and validation using Formik and Yup.
- Implemented Searching, Sorting, pagination, navigation, popup notification and Breadcrumbs.
- Fixed Critical Bugs, Refactored Code, made reusable components & layout and scalable Folder structure.
- Stayed up-to-date with the latest technologies and trends in web development, that was a constant R&D process.

DevLabs

- DevLabs is an Ed Tech platform that offers educational courses, along with training and consultancy services.
- Created responsive UI layouts for over 50+ screens within the Web App, incorporating elements such as charts, tables, and forms.
- Integrated the Razor Pay Gateway and REST APIs into the admin dashboard, enabling efficient management of user profiles, payments, and various features, including notifications, feedback, webinars, quizzes, and more.
- Bootstrapped the project using NEXT.js, leveraging Tailwind CSS and MUI for design, and incorporating Framer Motion for animations.
- Collaborated with clients, designers, and the team, including animations for enhanced user experience.

Sarvagram

- Developed a Mobile Web App for a client, enabling order processing and tracking, as well as connecting dealers with customers.
- Set up a project using React + Vite and organized it with folders for efficient code management. This included pages, reusable components, routes, hooks, data storage, services, and utilities to ensure scalability and consistent data-flow.
- Created the UI using AntDesign and TailwindCSS.
- Manipulated API data using Tanstack Query, worked on form-fields and validation, and handled data in the cache with React cookies.
- Implemented login flow, authentication using JSON Web Token (JWT) and set up auth-based navigation with React-Router-DOM.
- Implemented invoice and PDF generation functionality and fixed critical bugs.

InnerScore

- Led the development of the InnerScore website, a platform that enables teachers and students to share resources and collaborate.
- I was responsible for developing the website's user interface (UI), integrated it with the Backend data management system, and achieved responsive design for web, tablet, and mobile views using SCSS.
- Utilized React (CRA) as the framework, integrated React-Router-Dom for routing, Formik for efficient Form Data handling, and seamlessly incorporated Swiper and various third-party libraries to enhance the visual appeal of the design.
- Integrated REST APIs, and Intigrated Email JS with SMTP for automated email notifications and designed Figma mail templates.
- Achieved a 60% website performance improvement, better SEO, and Lighthouse Score.

Freelancer

Upwork / Fiverr

Oct 2021 – Jul 2022

- Implemented a payment form on StreetzWyze.com, an e-commerce platform, enhancing the overall user experience and security measures.
- Conceptualized a Dental App's UI/UX, providing insights into the product flow and its user experience. This project followed the Software Design Life Cycle.
- Applied UI/UX development principles to create mock-ups, wireframes, and prototypes for websites, and designed logos and illustrations for various clients.
